PowerSchool SIS PowerPack

Subscribe to continuous innovation with Power School SIS PowerPack Product Bundle!

PowerPack is an extensive collection of valuable products for PowerSchool SIS. Developed and supported by dedicated PowerSchool experts, PowerPack is specifically designed to maximize your school or district's efficiency, power operations, and meet requirements with confidence.

Key Benefits of PowerPack

Low Cost
Save money **bundling** multiple products into a single subscription offering

Reliable
Products **developed and supported** by the PowerSchool Services team

Plug and Play Scaling
Easily enable or disable each product so you can **choose only what you need**

Continued Innovation
PowerSchool is constantly working to **further enhance** the offering

Led by some of the most innovative thinkers and experts at PowerSchool, the PowerPack team works hard to analyze customer requests and process gaps, then execute quickly to deliver growing value to you. **Our dedicated team delivers new components on a regular basis.** Subscribe now to PowerSchool SIS PowerPack and you will receive all of the following products, plus additional components added, at no additional cost:

Web-Based Reports
Give your schools additional reports that can be run in the admin portal, teacher portal, and public portal. Access in each of the portals can be managed by administration. The reports include one course-based report card, one standards-based report card, one student transcript, and one low grades report with the added ability to upload school logos to the reports.

Utility Dashboard
Built specifically for PowerSchool and designed to help teachers carry out operations that are not typically available to them in the teacher portal, including access to log entries, locker information, test results, and the graduation planner. Access can be turned on or off by administration.

Early Warning System (EWS)
Tracks student grades, attendance, behavior, and credits toward graduation. Support students who are at risk of academic failure and to get them back on track.

Discipline Attendance Sync
Sync student attendance data based on disciplinary action (DET, ISS, OSS, EXP) taken against the student created by log entries. Add flexibility, save time, and improve data security.

Hide Standard Percent
Give your schools the ability to hide the percent shown when users view a standard score's details.

Teacher Attendance
Hassle-free way for Administrators to manage their Teacher's and Substitute's attendance along with leave balances in PowerSchool.

Enhanced PowerLunch
Give your lunch office and parents the ability to enter lunch selections for the week, month, or year. Parents enter their choices into the public portal.

Student Alert Management
A student alert package that gives your district the ability to create an unlimited amount of custom alerts, including field-based alerts that are automatically calculated in SIS. Alerts can appear in both the admin and teacher portals.

Flex Mailer
Give your administrative staff more flexibility when sending mass emails. No setup required - just choose the parents/guardians, add attachments, and let the system do the rest.

English Language Learners (ELL)
Collects required Federal and State government information pertaining to ELL students including Enrollment Gap, Parent Request Placement, and more.

Locker Management
Keep track of locker combinations and groups, easily assign lockers to groups of students in mass, and import/export locker information.

The PowerPack team is constantly reviewing enhancement requests and identifying new components to include in PowerSchool SIS PowerPack. Subscribe to the PowerPack newsletter through PowerSchool Community to stay informed of our latest innovations!
